

CITY OF RENO Planning Commission September 5, 2012 Staff Report

Agenda #
Ward #
1

CASE No.:

LDC13-00010 (Northwest Gateway Master Plan Amendment)

APPLICANT:

FJ Management, Inc

APN NUMBER:

212-112-02

REQUEST:

This is a request for a Master Plan amendment to change the Master Plan land use designation from Special Planning Area/McQueen Neighborhood Plan/Single Family Residential to Special Planning Area/McQueen Neighborhood Plan/General Commercial.

LOCATION:

The ±48.8 acre site is located south of the Robb Drive/Interstate 80 eastbound off-ramp intersection in the LLR1 (Large Lot Residential - 1 acre) zone.

PROPOSED MOTION:

Based upon compliance with the applicable considerations, I move to adopt the amendment to the Master Plan by resolution and recommend City Council do the same, subject to conformance review by the Regional Planning Agency.

BACKGROUND: The site is currently vacant. A previous Master Plan amendment request (LDC08-00103 – Flying J) from Single Family Residential (1 dwelling unit/acre – 3 dwelling units/acre) to Special Planning Area was denied by the City Council on July 16, 2008. Additionally, the Master Plan land use designations on the adjacent parcels to the west were amended from Mixed Residential to General Commercial on July 7, 2010 through LDC10-00045 (TCA Properties).

According to the McQueen Neighborhood Plan (MNP), Arterial Commercial (AC) zoning, Community Commercial (CC) and Public Facility (PF) are the three conforming zoning districts within the General Commercial land use designation. Reno Municipal Code Section 18.08.101(c) "Nonresidential and Mixed Use Base Zoning Districts" states that the purpose of the AC zoning district is to provide for commercial and service enterprises that generate large volumes of automobile traffic and are dependent upon direct or indirect access to major arterials. CC zoning provides for general commercial and service enterprises for the community at large and PF zoning provides for public facilities and public service uses which may be in private ownership, including utility uses parks and recreation areas and institutions.

ANALYSIS:

Land Use Compatibility/Master Plan Amendment: Land use surrounding the site consists of vacant residentially zoned property to the south and east; commercially zoned property to the west, a vacant residentially zoned parcel to the north, I-80 and existing commercial/high density residential uses on the properties north of the freeway. The site is relatively isolated by distance (500 feet) and grade (80 feet above) from the nearest developed adjacent residential property to the west and south that feature intervening slopes up to 4:1 and are undevelopable. The TCA properties to the west have been master planned and zoned to facilitate commercial development. The commercial and residentially zoned properties to the north and east are developable and are topographically similar to this property. This would allow joint development of this site with the properties to the north, east and west including common access.

The Master Plan designations surrounding the site consist of Single Family Residential (SFR) ≥1 acre/dwelling unit to three acres per dwelling units to the north and east and Mixed Residential (MR) 3-11 dwelling units per acre to the south, and General Commercial to the west per the McQueen Neighborhood Plan. In addition, the development and access to the approved TCA site to the west is contingent upon the grading of this subject site.

The existing SFR designation allows up to three dwelling units per acre on 15,000 square foot or larger lots. Property with this designation can be located where public and infrastructure are limited. In areas where the full range of urban services are available, one acre or larger lots are appropriate only as part of a larger master planned community. This designation is appropriate between rural and more intensive residential uses or at the edge of the City to provide compatibility with unincorporated lands. These properties often include development constraints such as steep slopes or limited access.

In order to approve a Master Plan amendment, several considerations must be evaluated. These are listed on page five and an analysis is provided below.

Change has occurred in the area and in the conditions on which the current designation was based consisting of construction of the Robb Drive/I-80 interchange in the early 1990's; annexation of the property into the City in the late 1990's; and City and Regional Policies which promote more intensive development on properties within the City. The existing Master Plan (SFR) and zoning LLR1 (Large Lot Residential – 1 acre) designations for this site are based upon simply converting the County Master Plan/zoning designations to City designations. Based upon the site's location adjacent to I-80 and a freeway interchange, development of the property with single family homes on one third to one acre lots is no longer appropriate. The proposed GC designation will allow more intensive development on the site, which is more compatible

with the existing conditions. If the GC designation is approved, subsequent development requests compliant with City code and adopted zoning would address issues related to allowed uses, buffering, architecture, lighting, operational characteristics, etc., to ensure the project is compatible with the area and appropriate for this site.

In conjunction with a zoning map amendment, this amendment allows for a wider range of uses and intensities. This is more consistent with its location adjacent to a freeway than the current designation. Since these issues will be addressed when a zoning map amendment is processed for the site, the GC designation proposed is generally consistent with the area and identical to the adjacent western parcels.

This amendment will allow for a greater potential mix of uses on the site which is a more efficient use of land. Higher intensity, mixed uses allowed with the AC zoning would promote pedestrian activities within the site as opposed to the existing SFR designation. The amendment would facilitate zoning that could facilitate more cost effective housing for people living or working on the site that could walk to nearby services. Existing transit service is provided on Robb Drive to the north, which could be extended to this site depending on its ultimate use and adjacent vacant properties. Together, these factors will promote orderly physical growth.

This site is located on the south side of a freeway interchange which provides adequate access. Transit service is currently provided to Robb Drive to the north. Fire services are available from the Mae Anne/Somersett Parkway intersection. This station is located approximately one mile to the northwest. This site is located adjacent to existing commercial and residential development to the north across I-80 which contains all required utilities. A sewer main is located ±1,000 feet to the south within the West Fourth Street Corridor. A City park is located on Robb Drive, ±4,500 feet to the north. Given the above, adequate transportation, recreation, utility and other facilities are available or can be extended to the site to support potential uses on the site. The actual demands and necessary improvements to support a project on this site would be more specifically determined with the subsequent zoning application and more specific entitlements.

The proposed change is consistent with City of Reno Master Plan and Regional Plan policies promoting infill development, efficient use of resources and reduction of urban sprawl. Higher intensities on the site will promote a more walkable environment and promote transit use. The site is well buffered from adjacent single family development by distance and grade, as discussed above. This site is located in an area which has historically been considered a gateway to the City. To support this gateway concept, uses such as an upscale office park, with support, commercial and higher density housing would be most appropriate. These types of uses will promote the jobs to housing balance originally envisioned with adoption of the McQueen Neighborhood Plan in the mid 1980's. This type of development would also reduce trips and congestion on I-80 by providing services and jobs for the residents in the McQueen Area.

Policies:

McQueen Neighborhood Plan: Policy 2 of the MNP supports the land use change:"Commercial zoning should be limited to existing properties, except in freeway corridor areas." Additional standards for development within the freeway corridor are specified in the McQueen Neighborhood Planning Area Overlay District for properties located within 500 feet of the freeway right-of-way.

Other Reviewing Bodies: The Reno Police Department provided a "calls for service report" for the area (**Exhibit A**). No comments relevant to the Master Plan amendment were received by other agencies.

Neighborhood Advisory Board: This project was not formally reviewed by the Ward 1 Neighborhood Advisory Board (NAB), as their August meeting was cancelled; however, project material was submitted to NAB members and no comments were received. The project was reviewed by the Northwest NAB and noticed as a neighborhood meeting as discussed below.

<u>Neighborhood Meeting</u>: In accordance with NRS 278.210 the applicant noticed and held a neighborhood meeting in conjunction with the regular Northwest NAB meeting, on August 16, 2012, to explain the Master Plan amendment to the board and surrounding neighbors (**Exhibit B**).

	AREA DESCRIPTION

Master Plan Amendments

MASTER PLAN CONSIDERATIONS:

For the Planning Commission:

- (a) Bears relation to the planning and physical development of the City; and
- (b) Is so prepared that it may be adopted by the City Council as a basis for the physical development of the City.

For the City Council:

- (a) As may be applied practically to the physical development of the City for a reasonable period next ensuing will:
 - 1. Serve as a pattern and guide for that kind of orderly physical growth and development of the City which will cause the least amount of natural resource impairment;
 - 2. Conform to the adopted population plan and ensure an adequate supply of housing, including affordable housing; and
 - 3. Form a basis for the efficient expenditure of funds relating to the subjects of the City of Reno Master Plan.
- (b) Master plan amendments shall not be in effect prior to the Truckee Meadows Regional Planning Commission finding the master plan amendments conform to the Truckee Meadows Regional Plan.

RENO POLICE DEPARTMENT Inter-Office Memorandum

Date: July 22, 2012

To: COMM DEVELOPMENT

From: LT. SHANNON WIECKING

Re: LDC13-00010

The following document is submitted for your consideration. The ideas, contents herein are the opinions of the listed, qualified Crime Prevention through Environmental Design (CPTED) Police Officer, and are based on CPTED Principles and Factors. Implementation of the recommendations in no way guarantees a crime-free project. Recommendations listed are designed to make the applicant aware of certain issues which may arise and present possible solutions.

<u>Territoriality</u> – (Concept of clearly defining ownership over space):

<u>Surveillance</u> – (Concept which focuses on increased visibility):

Management/Maintenance – (Concept which focuses on how Mgmt. runs and maintains a property):

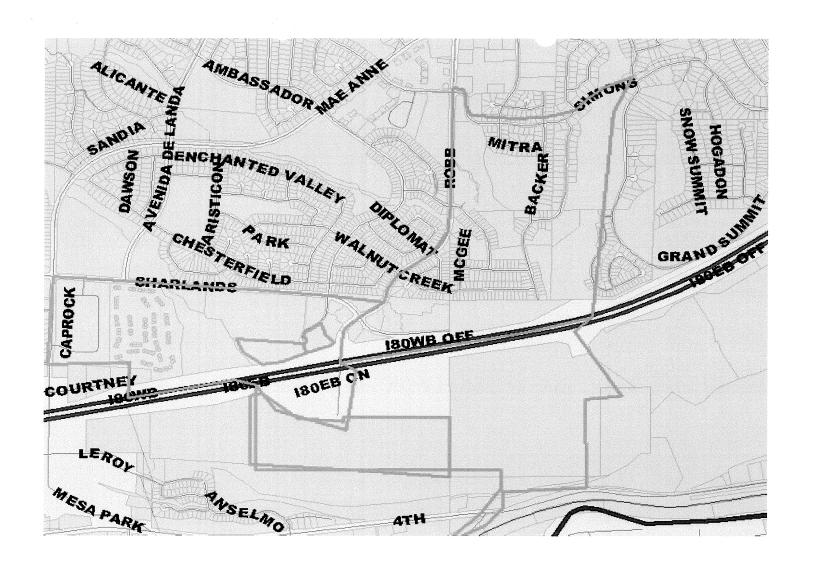

Activity Support – (Concept which focuses on appropriate use of areas and building):

Access Control – (Concept that focuses on entry & exit points):

Other Factors – (Land Use, Movement Predictors, Edge Effects, Activity Generators, Displacement, Etc.):

(Comments):

No issues noted

Subject: Northwest Gateway - August 16 NAB Meeting

Dear Neighborhood Advisory Board Member,

Attached is an information packet on the Northwest Gateway Master Plan Amendment request which will be presented at your regular meeting on August 16th. Because this is a Master Plan Amendment request, we have also noticed all property owners within 750' of the project boundary of the meeting as well.

As a point of clarification, this property was previously known as the "Flying J site." **THE SITE IS NO LONGER PROPOSED FOR A TRUCK STOP OF ANY SORT.** We can provide further clarification of this matter at the meeting but wanted to emphasize that there has been significant change in terms of the direction for which the site is proposed.

Please do not hesitate to contact me should you have any questions prior to the meeting. We look forward to presenting the project to you.

Mr Gilbert, recieved your post card concerning the redevelopement of the Northwest Gateway Master Plan Amendment LDC13-00010. I'am in opposition to this change in zoning. I purchased my home with the knowledge that the 48.8 acres behind my home were to be developed residentual not commercial. I feel that this change in zoning is a hardship upon our homes at the expense of the city of Reno hoping to raise tax revenue. While our homes would probably go down in value even more the cities tax base would also go down. Don't know the exact numbers but it seems unfair and in the end a waste of time. To change the zoning at this time after the decline of property values is a hardship on all property owners in our developement. Thanks for your time and concideration. Bruce Sherwood
